Let you visitors put their opinion about your website !

ACTIVEBOOK
The very lightweight guestbook !

Activebook is a simple lightweight script that can be integrated into any website. It includes an admin control for deleting and modifies comments.

ACTIVEDEV.NET
www.activedev.net

- jQuery/AJAX, PHP, MY SQL powered.
- Easy to integrate into any website.
- Work with one Database table.
- Retrieve the avatar from **Gravatar** office using email address.
- Antiflood support.
- Possibility to receive email when someone add new comment.
- Edit, Delete comments from admin panel.
- Basic integrated administration in the forehead.

1. How to install

Create your database:

1. Import the **bbd.sql** file.
2. Open **config.php** in actions folder.
3. Modify the following database settings.
    3.1. define('DB_HOST', 'localhost');
    3.2. define('DB_LOGIN', 'root');
    3.3. define('DB_MDP', '');
    3.4. define('DB_BDD', 'database');

After finish the installation, you may also need to complete the global settings.

2. ActiveBook Global Settings

Open **config.php** and set the following parameters:

Administration connection parameters:

```
$superadminlog      = 'admin'; // Administrator login

$superadminmdp     = 'admin'; // Administrator password
```
